#4138	Felted Goat's Milk Soap 9 bars available. Order number of bars. A GOAT IN SHEEPS CLOTHING - A handmade bar of our goat's milk soap felted with sheeps wool to create a soap and wash cloth in one. No more slippery soap. Wool has natural antifungal properties and will retain it's freshness through the life of the bar. It also acts as a gentle exfoliant. The soap will lather up through the wool with use and the wool will continue to shrink around the bar. When the soap is gone, you are left with a small wool pad which is great in the kitchen or bath. You could even cut a slit in one end and add another small bar of soap. How cool is that?		\$5.50/bar
#4135	Goats Milk Soap - Acorns and Oak 7 bars available. Order number of bars. This soap has a wonderful rustic pine scent, combines with wild violets and fall leaves. Very outdoorsy and pleasing scent. Goat milk has a special ingredient called capric-capryllic triglyceride. This oil helps moisturize the skin and is considered one of the best at doing so. Another great thing about handmade soaps is that the glycerine, which is created in the soap making process, is not extracted as is the case with commercially made soaps and remains in the product as a added moisturizer. Our soaps are handmade in small batches using the cold process method. We develop our own recipes and use our own fresh clean goat's milk. The high butterfat content of our goats milk makes for a wonderfully rich bar of soap that is so very good for your skin! We offer a generous size bar. Our bars are hand cut and beveled and range from 4.9 to 5.2 oz. Each bar contains over 1.75 oz. of goat's milk. We never add water and don't use lard - only the fine oils of olive, coconut, and palm. Watch for new scents and botanicals to come. ***Please note - soap wrappings may vary slightly in design from that in photos.		\$3.50/bar

This is a great smooth beefsteak averaging 3 1/2 - 4 in. across with outstanding fruit set in cooler temperatures. This variety continued producing high quality fruits right up to the last killing frost. When other varieties stopped producing in the heat, this one didn't. Toward the end of the farmers' market, I could still find tomatoes from this variety. We picked a 5 gallon bucket of green ones and had great tasting ripe tomatoes at Christmas. Outstanding quality and temperature tolerance makes this an excellent choice for early and late season production.</p>	All Natural	\$2.75/container
